SMMS[∞]
SUPER MODULAR MULTI SYSTEM

Customized for efficiency.
Customized to help you ace.

TOSHIBA AIR CONDITIONING

 **Better Air Solutions**

TOSHIBA EXPERIENCE THE FUTURE

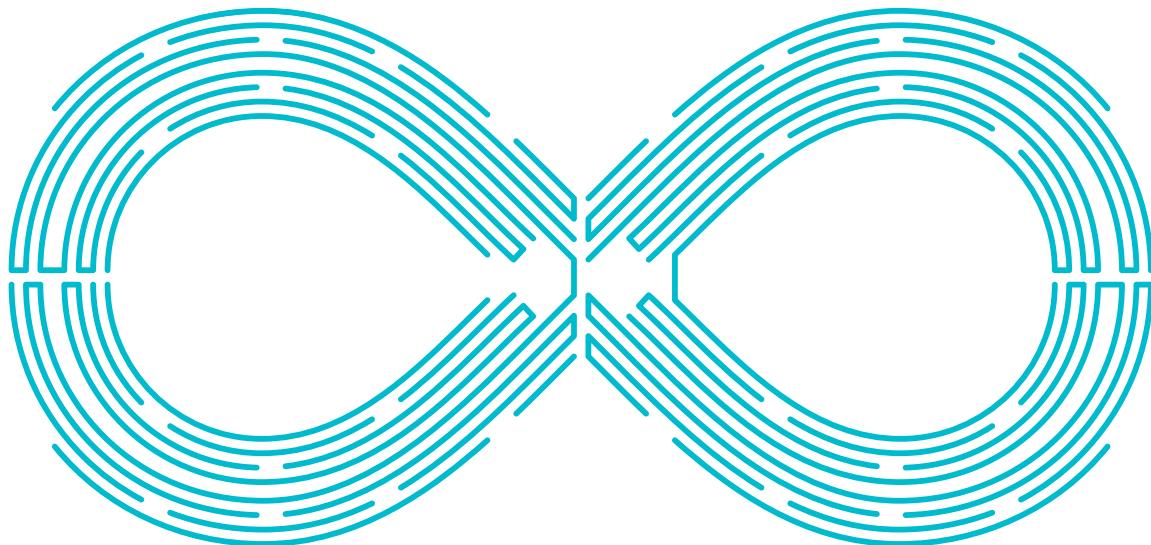

SMMS ∞

› CUSTOMIZED FOR EFFICIENCY CUSTOMIZED TO HELP YOU ACE

Discover the next generation of efficient and flexible VRF system for sustainable cooling. Engineered in Japan, the SMMS ∞ integrates latest technological innovations and provides multiple customization options to achieve top-class efficiency and ensure unrivalled comfort.

SMMS ∞
SUPER MODULAR MULTI SYSTEM

Enhanced Efficiency
Improved Flexibility
Superior Serviceability

Benefits for the consultants

SMMS ∞ offers unlimited possibilities in terms of capacity, connectivity, indoor unit lineup and control solutions, providing the correct solution for your customers needs. Toshiba's intuitive selection tool will guide you through the selection process with minimal input from your side, ensuring trouble-free installation and operation.

Benefits for the users

There is nothing like a comfortable place to enjoy the present moment. Full of Toshiba innovations, the new SMMS ∞ guarantees all year round comfort combined with superior energy management, advanced air filtration and full control solutions for maximized product usability.

Benefits for the installers

The brand-new chassis of SMMS ∞ Infinity is both compact and lightweight. The new design and technology make it easier for an installer to install SMMS ∞ Infinity. It requires simplified piping work, reduces the need for additional refrigerant recharge and simplifies test runs. Therefore, the installer can achieve excellence in their installation with this system.

A BRAND NEW CHASSIS

Engineered in Japan, SMMS[∞] integrates all the latest technological innovations from Toshiba to achieve top class efficiency and ensure unrivalled comfort.

Up to 26HP single module / 120HP combination

Simplified maintenance:
Easy access to main internal components

Earthquake and typhoon Durability chassis

› UNIQUE ON THE MARKET: TWIN ROTARY COMPRESSOR

The exclusive Toshiba twin rotary compressor brings outstanding performance to SMMS[∞] for enhanced system reliability.

- Large capacity
- Wide operating range
- Low required refrigerant
- Low vibration
- DLC treatment

› TOP CLASS EFFICIENCY

The SMMS[∞] utilises new and improved highly efficient core technologies, resulting in greater energy efficiency and performance.

50% part load

EER up to 8.6

100% load

EER up to 5.2

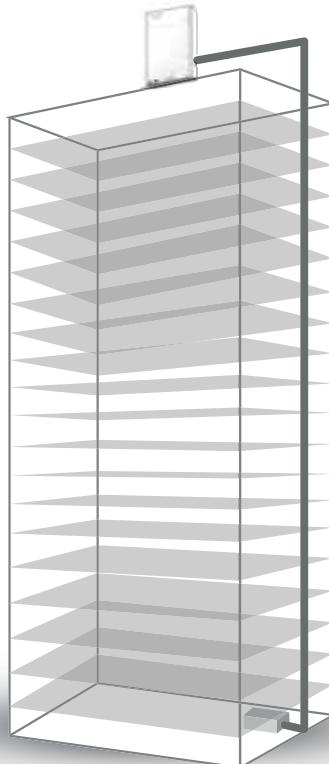

INFINITE FLEXIBILITY

The SMMS ∞ exceeds the limits of VRF for maximised project coverage, resulting in a combination that offers options on efficiency, space, and cost. Whatever your requirement, SMMS ∞ can be customized to deliver the best result for your project.

4,000 combinations patterns
Free combination

1,200m max
Long piping length

110m max
High piping lift

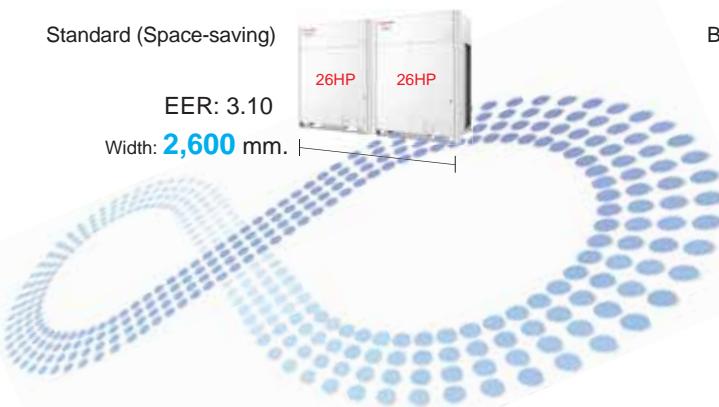

Up to 128 indoor
Large IDU connection

Max 120HP by 5 units
connection
Large system capacity

Max 200% combination
High diversity

› FLEXIBLE FREE COMBINATION

Combinations examples - SMMS ∞ 52HP
total 69 combinations

Standard (Space-saving)

EER: 3.10
Width: **2,600** mm.

Max. Highest efficiency

EER: 4.85

Width: 5,630 mm.

Unit combination can be customized to meet
the installation site requirement.

Total

Width: **3,610** mm.

Balance (Moderate)

EER: 4.09
Width: **4,020** mm.

Balance efficiency

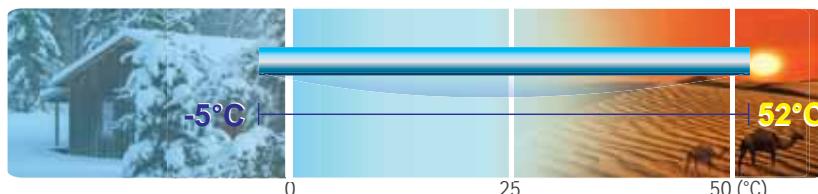

EER: 4.62
Width: 5,030 mm.

Note: Outdoor unit still should align from larger to smaller HP

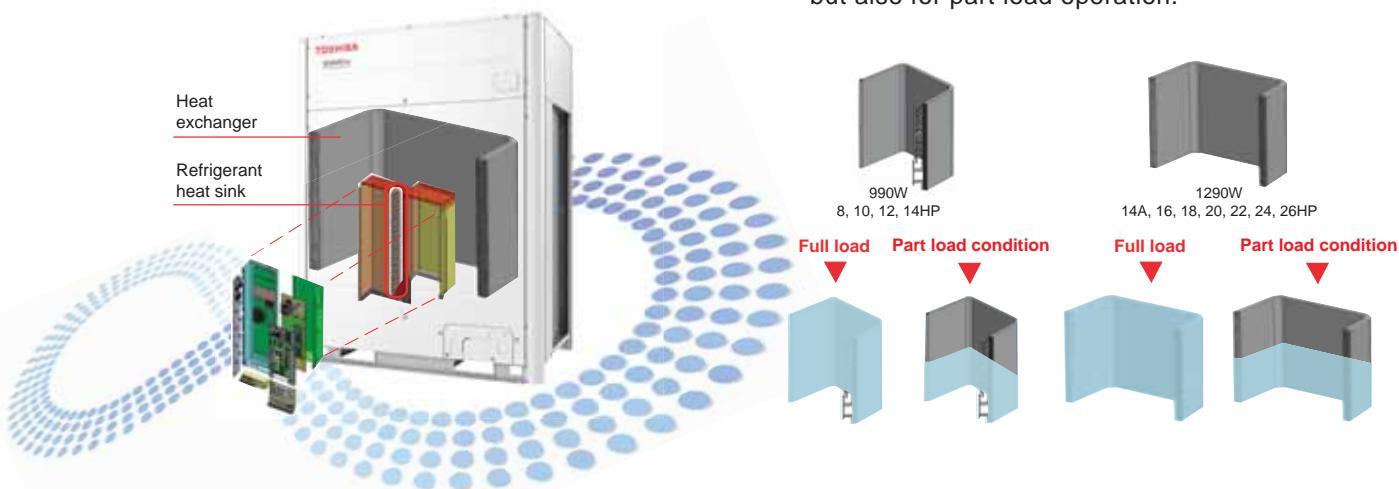

COMFORT ABOVE ALL

› WIDE OPERATING TEMPERATURE RANGE

The refrigerant heat sink can bring down temperature of electronic parts. By using this new function, SMMS ∞ can operate in high ambient condition such as 52°C.

SMMS ∞ can select optimal heat exchanger size based on operating mode, outdoor temp, and capacity load. It allows SMMS ∞ to realize high efficiency, not only for full load operation but also for part load operation.

› STRONG ADAPTABILITY

SMMS ∞ integrates new features to adapt operations to local constraints with a constant target: the alliance of comfort and energy savings.

Heat exchanger usage area automatically varies depending on workload, maximizing energy savings and system reliability.

Splitted heat exchanger

Smart Grid ready with remote or dry contact demand control function.

Demand control

Automatic backup in case of combinations systems failure.

Auto backup function

Smart control to automatically equalize compressor operating hours.

Rotation drive

Inverter box is fully sealed up in order to avoid malfunction due to small animals.

Sealed up inverter box

Automatic refrigerant charge to minimize installation workload.

Auto refrigerant charge

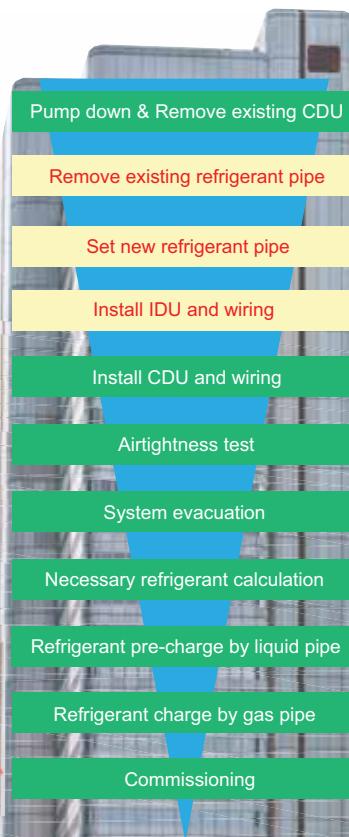

INSTALLATION FLEXIBILITY

Reusable pipes and IDU

Toshiba SMMS[∞] comes with the flexibility of reusing pipes and IDU of the existing VRF solution. This flexibility lets SMMS[∞] replace any VRF solution in a shorter time. SMMS[∞] is a cost-effective solution as it allows you to replace both IDU and ODU in different intervals.

Conventional VRF

Auto refrigerant charge

Auto refrigerant recharge helps when using the existing pipes, as the pipe length may not be unknown initially. It also helps recharge the refrigerant with more accuracy and reliability.

Since it is not required to know the refrigerant filling amount in advance, it helps effective time utilization of the service team and reduces the load.

SMMS[∞]

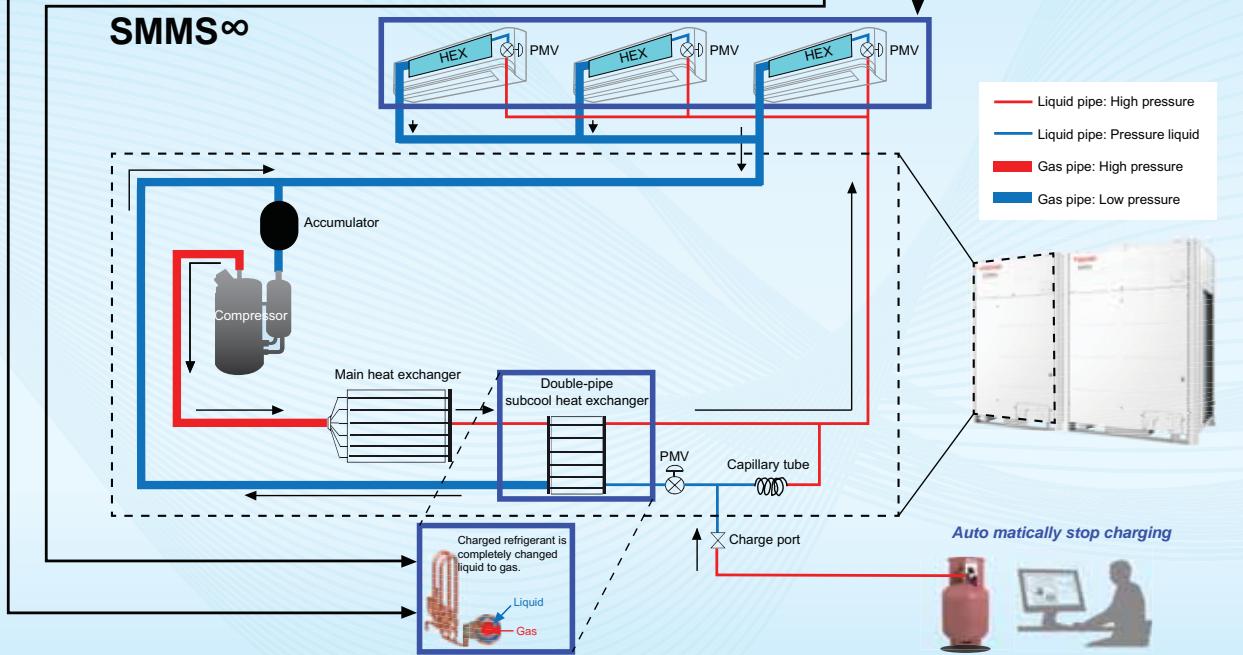

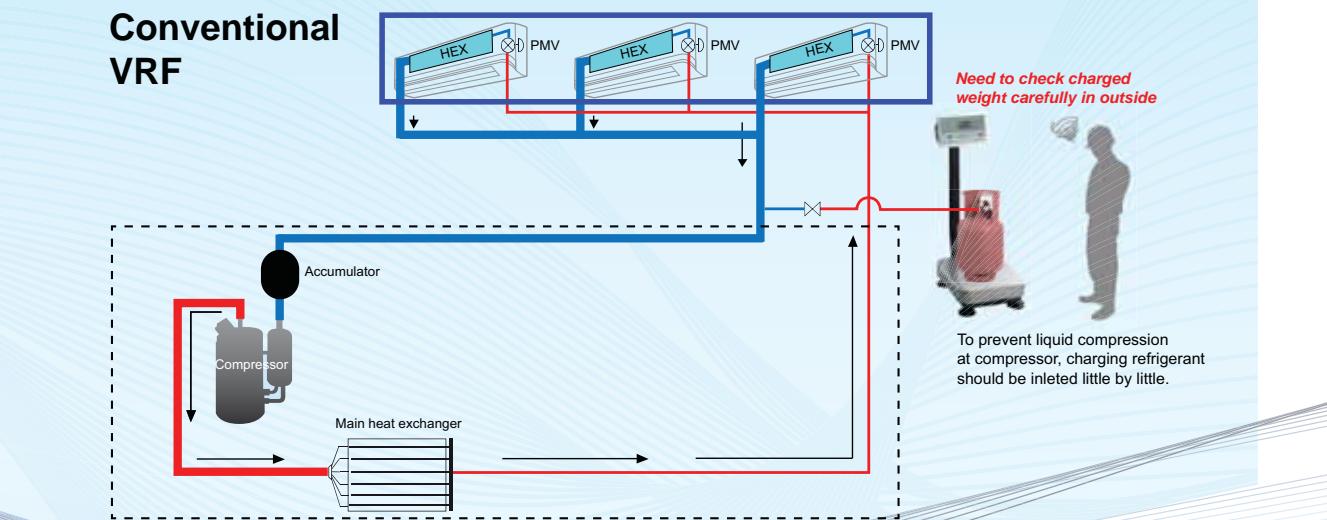

RELIABILITY

Toshiba SMMS ∞ uses a "Double-pipe subcool heat exchanger" that transforms the charging refrigerant completely from liquid to gas phase. Therefore, even during high-speed refrigerant charge conditions, SMMS ∞ reduces the risk of liquid compression.

ACCURACY

Toshiba SMMS ∞ senses temperature data through "Double-pipe subcool heat exchanger" and "IDU PMV condition" to identify the required refrigerant amount accurately.

SMMS ∞ **Conventional VRF**

IDU

Piping rules

		Allowable value	Piping section
Piping length	"Total extension of pipe (Liquid pipe, real length)"	Single ODU Combination ODU	LA+LB+LC+La+Lb+Lc+Ld+Le+L1+L2+L3 +L4+L5+L6+L7+a+b+c+d+e+f+g+h+i+j
	Farthest piping length (*1)	Equivalent length Real length	250m 210m
	Equivalent length of farthest piping from 1st branching (*1)	90m (*2)	L3 + L4 + L5 + L6 + j
	Equivalent length of farthest piping between outdoor units	40m	LA+LB+LC+Le(LA+LB+LC+Ld)
	Max. equivalent length of main piping	Equivalent length Real length	120m (*3) 100m (*3)
	Max. equivalent length of outdoor unit connecting piping	10m	Le(La, Lb, Lc, Ld)
	Max. real length of indoor unit connecting piping	30m	a, b, c, d, e, f, g, h, i, j
	Max. equivalent length between branches	50m	L2, L3, L4, L5, L6, L7
			L1
Difference in height	Height between indoor and outdoor units	Upper outdoor unit Lower outdoor unit	70m (*4)(*7) 40m (*5)(*8)
	Height between indoor units	50m (*9)	-
	Height between outdoor units	5m	-
			-

(*1) : (e) is outdoor unit farthest from the 1st branch and (j) is the indoor unit farthest from the 1st branch.

(*2) : If the height difference (H1) between indoor and outdoor unit exceeds 3 m, set 65m or less.

(*3) : If the max. combined outdoor unit capacity is 54HP or more, then max. equivalent length is 70 m or less (real length is 50 m or less).

(*4) : If the height difference (H2) between indoor units exceeds 3 m, set 50 m or less.

(*5) : If the height difference (H2) between indoor units exceeds 3 m, set 30 m or less.

(*6) : Total charging refrigerant is 140kg or less.

(*7) : Extension up till 110m is possible with conditions below:

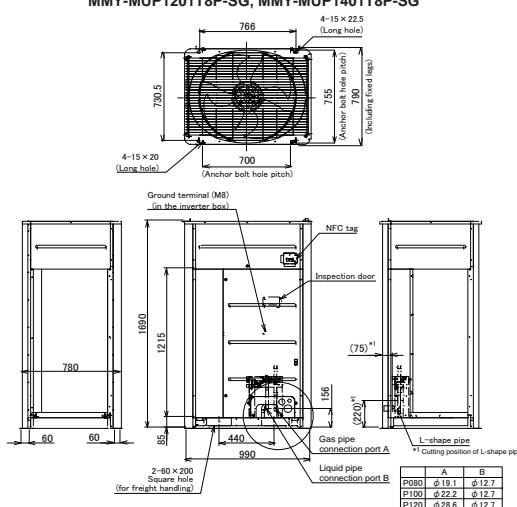

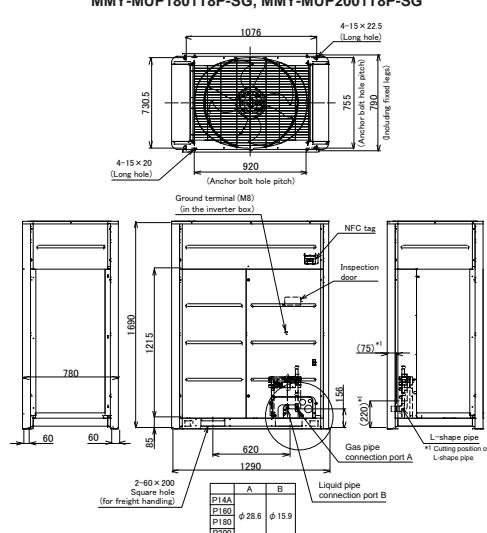

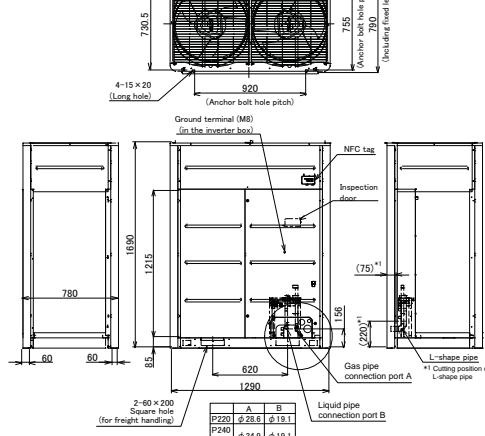

- Single outdoor unit system
- Connected ratio of indoor units to outdoor units is below 105%
- Liquid side is been increased 1 size from the standard size
- Height between indoor units is equal or less than 40 m.

(*8) : Extension up till 110m is possible with conditions below :

- Height between indoor units is equal or less than 3 m.
- Connected ratio of indoor units to outdoor units is below 105%
- Minimum capacity of connecting indoor unit is more than 3HP

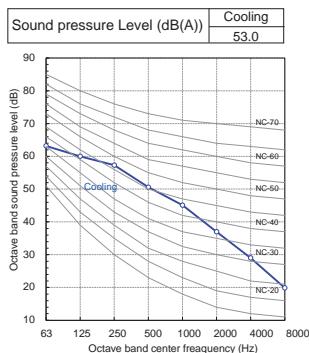

(*9) : If the connected ratio of indoor units to outdoor units is more than 105%, set 15 m.

WIDE CHOICE INDOOR UNITS

› LARGE INDOOR UNIT LINE-UP

The wide range of indoor units help enhanced design flexibility and lower costs, ensuring efficiency in installing a perfect system.

- 18 different types of indoor units
- Capacity from 0.8 HP to 20 HP
- For cooling and fresh air production

› SUPERIOR AIR COMFORT

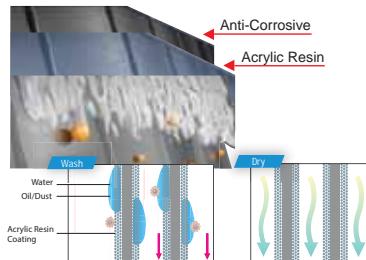

Cool comfort with soft cooling mode

The development of the soft cooling mode provides a new level of cooling to personalize the air flow intensity, angle and direction directly from the remote control and enjoy the indoor environment at the right temperature without being exposed to the direct cold draft.

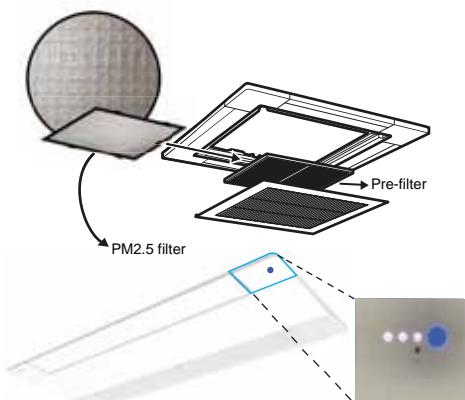

Special coated for IDU heat exchanger

With a specially coated heat exchanger, Toshiba IDU provides odorless and fresh air always. This special coating enables the dust particles on the heat exchanger to be washed out along with condensed water.

Air purifier solution

Air purifier kit removes small particles by high-quality filter and Plasma solution. This new solution traps mold, pollen and PM2.5 particle by electrostatic force. Moreover, the users are notified of the air quality level by the LED indicator color.

Low consumption for low operation cost

Premium comfort doesn't mean high power consumption. By using DC motor, large air discharge surface and resin coating system, Toshiba reduces drastically the indoor unit power consumption.

IAQ SOLUTION

> PARTICLE SIZE OF PM2.5

> IMPACT FOR...

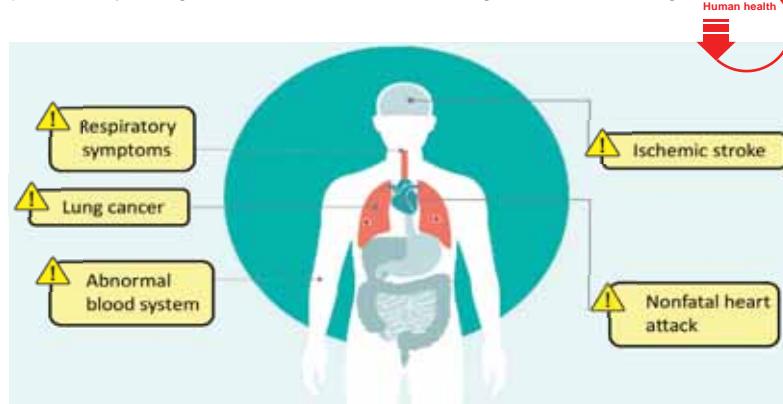

Impact for air conditioner

The accumulation of dust particles on the heat exchanger reduces the overall efficiency of air conditioners and air volume. It leads to poor indoor air quality and impacts the health of occupants. It also reduces the life span of the air conditioner.

Impact for human health

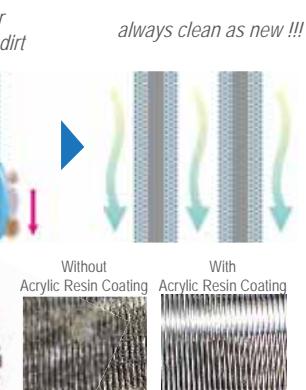

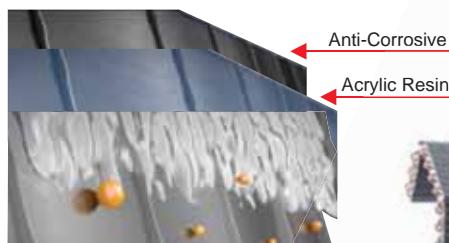

PM2.5 particles have risk to penetrate deep into the respiratory tract. Moreover, some particles may even get into the bloodstream and causing severe health damage.

> SOLUTION TO...

Solution to keep the heat exchanger of indoor unit stays clean always

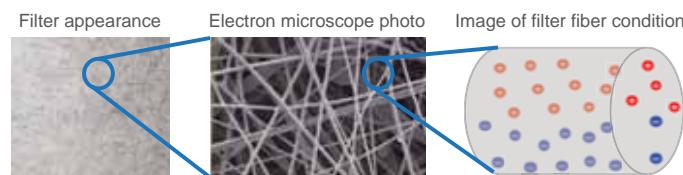

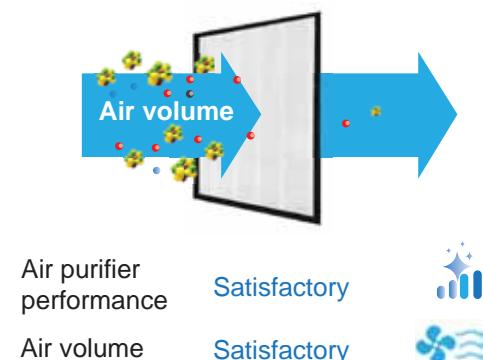

Acrylic resin coated heat exchanger enables the dust particles on the fin to be washed out along with drain water. This keeps the heat exchanger always clean, with better cooling performance.

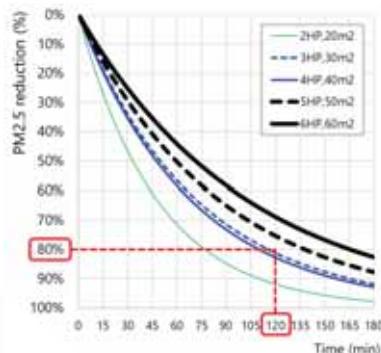

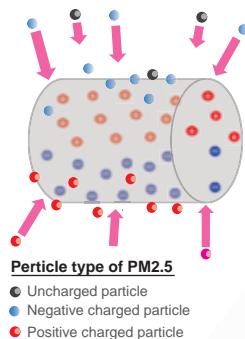

INDOOR AIR QUALITY SOLUTION

> SOLUTION TO...

Solution to keep the indoor air clean

NEW PM2.5 filter

PM2.5 filter has "Electrostatic" solution.
Each fiber of PM2.5 filter captures PM2.5 particles by Electrostatic force, achieving effective filtration despite a thinner filter.

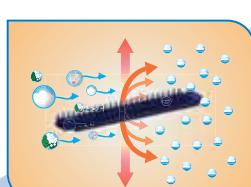

**NEW Plasma Air purifier (1way cassette)**

Pre-filter
Pre filter captures the large dust particles

Plasma Air purifier

Resin coated heat exchanger

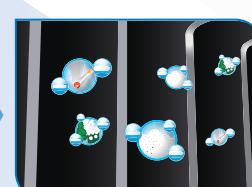

Due to the special coating on the heat exchanger, the pollutants do not accumulate and get drained out with condensing water.

Plasma ionizer forces impurities to adopt a negative electrical charge

Pollutants become negative charge

Negatively charged pollutants get attracted towards the heat exchanger.

The dust sensor detects PM2.5 and PM10 concentrations and sends PM concentration data to the Air Quality indicator. The Air Quality indicator then displays the color basis whatever is maximum between PM2.5 and PM10 as per the following criteria:

Color	Blue	Green	Yellow	Red
Air quality category				
PM 2.5 ($\mu\text{g}/\text{m}^3$)	0-15	16-35	36-75	> 76
PM 10 ($\mu\text{g}/\text{m}^3$)	0-30	31-80	81-150	> 151

CASSETTE

MMU-UP_1H-E 4-WAY CASSETTE HIGH PERFORMANCE

High efficiency 4-Way Cassette, simple and elegant design which fits various indoor space. It has a unique flap style for optimal air distribution.

Controller (Optional)			Wired and infrared remote controller	
Connecting pipe	Gas side	mm	9.5	
	Liquid side	mm	6.4	
	Drain port (nominal dia)	mm	25	R1

Avoid installing in the following places.

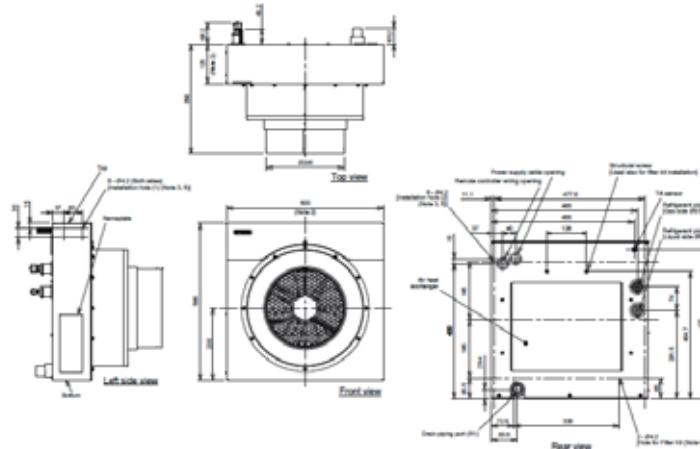

- A kitchen in restaurant or places around machines and equipment in a factory, where a lot of oils are used.(Oil adhering to the heat exchanger and the resin parts in the indoor unit may lower the unit performance, splash water drops, or produce mist and may cause the resin parts to be deformed or damaged.)
- Places where iron or other metal dust is present. If iron or other metal dust adheres to or collects on the interior of the air conditioner, it may spontaneously combusted and start a fire.

AIR-TO-AIR HEAT EXCHANGER

MMD-VN

AIR-TO-AIR HEAT EXCHANGER WITH DX-COIL

MMD-VN ventilation products are using exhaust air + DX-coil to pre-condition the incoming air, thus reducing the cooling load and the overall size of the required air conditioning system.

CAPACITY

4.1 kW ~ 8.25 kW

AIR FLOW

Up to 500m³/h ~ 950m³/h

SOUND PRESSURE LEVEL

34.5 dB(A)

LOCAL CONTROLS

Other information

WIRELESS SOLUTIONS KEEP CONTROL

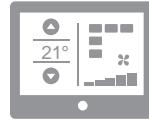

In addition to the high quality of the air conditioners, the controls also play a significant part in the ease-of-use and efficiency of the units. Optimized settings create the perfect climate. As well as local control options, Toshiba also offers a broad selection of central control systems or the option to integrate these in the building control system.

› ONE CONTROL FOR EVERY USAGE

Local controls

Cable remote controls (max. cable length 500 m) or wireless infrared remote controls are used to control individual units or groups of up to 8 indoor units. Additional modules allow units to be controlled from any location via apps or the Internet.

Central controls

VRF systems can be controlled from a preferred central location, such as the reception or plant room. Cable lengths can be max. 2,000 m and up to 512 indoor units can be controlled.

Building control systems

Toshiba air conditioners can be interlinked with all conventional building control systems. This makes air conditioning an integral part of the central control of a building.

› WHEREVER YOU ARE

On the cloud with Toshiba AC control app

Locally with standard remote control

Using Toshiba WebBrowser for all your facilities

› TRUST TOSHIBA TU2C-LINK

All control devices are connected to the air conditioner side using Toshiba's dedicated central control network, also called the TU2C-LINK. It can be used to directly connect all equipment.

Wiring: 2-core, non-polarity

Type: Shield wire

Size/length:

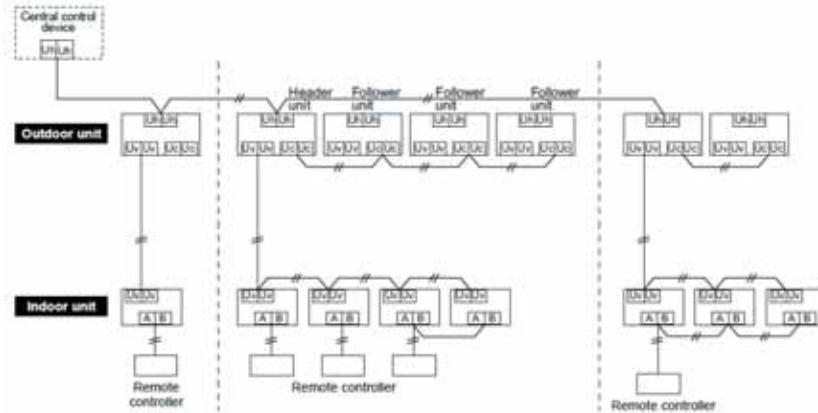

- 1 to 1.5 mm² / Up to 1,000 m
- 2 mm² / Up to 2,000 m

CENTRAL CONTROL

Drawings

Focus on Web Browser

The Smart Manager can be remotely connected via a computer and all functions can be controlled via web browser:
Standard operation - Advanced scheduling - Dual set point management - Up to 64 zones - Permit/Prohibit function - Energy saving - Return back

Focus on Data Analyzer

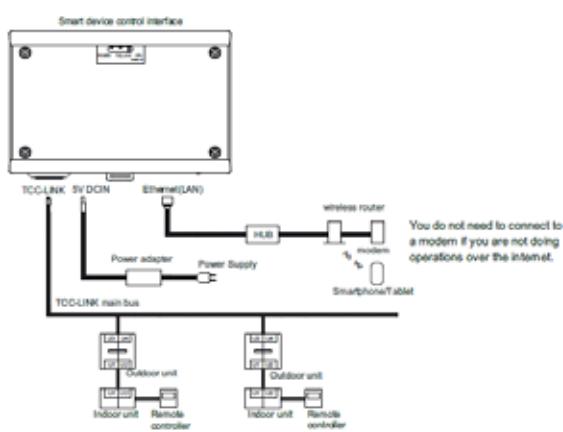

With or without power meter, the Data Analyzer software allows facility manager to manage system energy consumption. Through graphics on different periods, different indoor units, different energy consumption zones can be compared to optimize global efficiency. Set point, ambient temperature and outdoor temperature are monitored.

CLOUD SOLUTION

Part number	BMS-IWF0320E - Smart Device control interface	
App name	Toshiba AC control	
Picture		
Dimensions (HxWxD) in mm	140x90x45	
Compatibility	All indoor units (except hot water module, DX kit, fresh air, A2A heat exchanger)	
Connectivity	1:32	
Standard functions	On/Off	•
	Mode (heat, cool, ventilation, dry, auto)	•
	Temperature setting	•
	Fan speed (auto, manual 5 speed)	•
	Air direction (swing mode or manual orientation)	•
Scheduling	Timer function	•
	Schedule function	•
	Return back	•
Advanced functions	Energy save function	•
	Eco temperature shift	•
	Soft cooling	•
	Customize room/floor/building name	•
Central control	Permit/prohibit function	•
	Group control	•
Display & Interface	Interface	App
	Multilanguage	•
	App compatibility	Android & IOS
	Devices compatibility	Smartphone and Phablet
Installation & maintenance	Filter dirty indication	•
	Error display	•
	Error transfer by Email	•
Users	User access	Login & Password
	Max user	1 admin / 32 users
Communication protocol	TCC-LINK

Clock settings	• (via intranet acces only)	-
Operation mode restriction	• (via intranet acces only)	-

*1:Only the air conditioners in the "Access Area" can be displayed.

*2:If the locking setting is enabled, you cannot do any settings.

*3:The alarm settings for "Access Area" can only be displayed.

*4:The settings can only be displayed.

Toshiba AC control

Designed for commercial applications, the Toshiba AC Control App is your one-stop solution for managing up to 32 indoor units via an Android or iOS smartphone, with all main functions accessible in a single touch.

Additional PCB for Indoor units

Optional connection kit TCB-PCUC2-E

SIGNAL

OUTPUT TERMINAL TB1

Signal outputs (Mode, fans status, alarm, defrost,...) are extracted from "OUT1", "OUT2", and "OUT3".

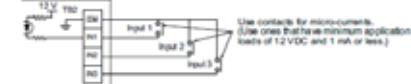

EXTERNAL

DIGITAL INPUT TERMINAL TB2

Stop air conditioner or lock local remote by inputting signal.

"Voltage OFF" input

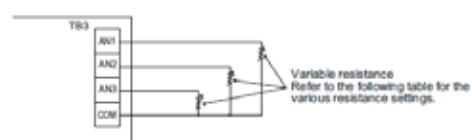

"Voltage ON" input

EXTERNAL

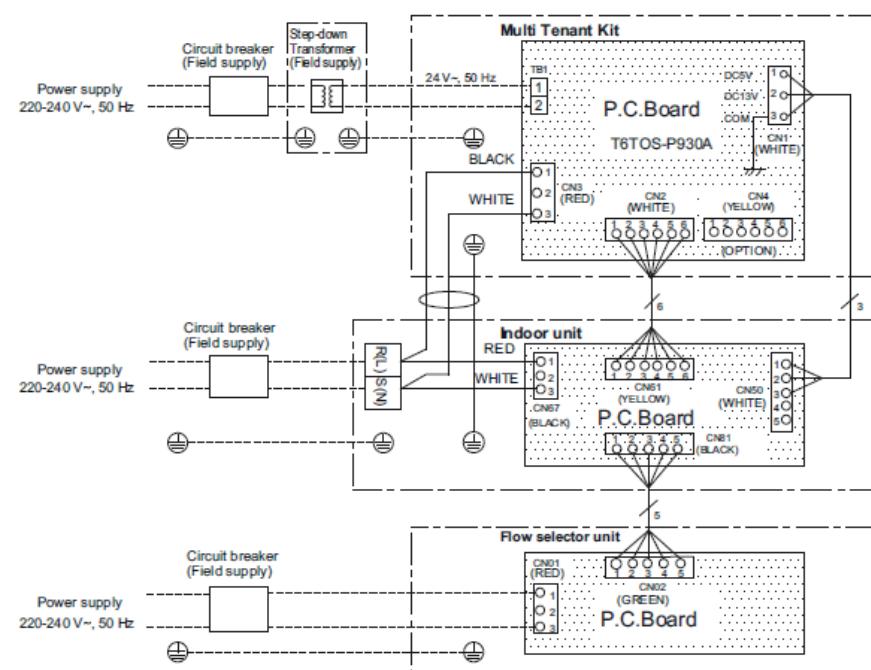

ANALOG INPUT TERMINAL TB3

Change the indoor unit's operation mode (AN1), set temperature (AN2), and blower setting (AN3) by connecting a variable resistor to the analog input terminal.

Multi tenant kit TCB-PSMT1E

For multi tenant application, this PCB maintain low voltage power during tenant absence when main power supply for the IDU is shut down.

Features

Part number	BMS-IFMB1280U-E	TCB-IFLN642TLE	BMS-IFBN1280U-E	TCB-IFCB640TLE

BUSINESS / CONTROL SUMMARY

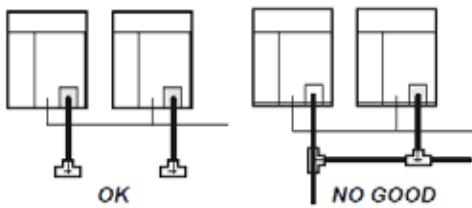

Controls

Model number	Reference	TCC-LINK	TU2C-LINK	Description	Used with
BMS-CT256U-E	7" Touch Screen Controller	x	x	Enables full control of up to 256 indoor units	
BMS-CT5121E	12" Touch Screen Controller	x		Enables full control of up to 512 indoor units with electric billing, ML	
BMS-IFBN1280U-E	BN Interface	x	x	BACnet Interface for LC & VRF	Enables integration with BACnet
BMS-IFDD03E	Digital I/O relay interface	x		Digital I/O relay interface	Touch screen controller, Compliant manager, Web based controller, Smart Manager
BMS-IFKX0TLR-E	1:1 KNX interface	x		Connect the system to a KNX Building Management System	Remote Control wiring
BMS-IFLSV4E	TCS-Net Relay Interface	x		Relay for integration to TCS-Net	Bacnet gateway, Touch-screens & Web based controller
BMS-IFMB0TLR-E	1:1 Modbus interface	x		Connect the system to a Modbus Building Management System	Remote Control wiring
BMS-IFWH5E	Energy monitoring relay interface	x		Energy monitoring relay interface	Touch screen controller, Compliant manager, Web based controller, Smart Manager
BMS-IWF0320E	Smart Device Control Interface	x		Enables full control of up to 32 indoor units by usin Toshiba AC app (Smart phone & Tablet)	
BMS-SM1281ETLE	Smart BMS Manager with data analyzer	x		Enables full control of up to 128 indoor units with Energy Monitoring and Advanced Control Options.	Network 1:1 model connection interface required for DI/SDI (Excluding high-wall type)
NRB-1HE	Remote ON/OFF adapter	x		Allows ON/OFF control	All Air-to-air heat exchangers
NRC-01HE	Wired Remote Controller	x		Air-to-air heat exchanger remote controller, including with DX coil and humidifiers models	Air-to-air heat exchangers and Air-to-air heat exchangers with DX coil
RBC-AMS41E	Remote controller with schedule timer	x		Indoor unit operation with schedule timer (7-days) allowing to program 8 functions/day + clock display	
RBC-AMSU51-EN/ES	Design remote Controller with schedule timer	x	x	Multi-Language LCD display, a built-in 7-Day timer, Energy Saving options and return back function,Dual set points, and Soft cooling. EN = English, Italian, Polish, Greek, Russian, Turkish. ES = English, Spanish, Portuguese, French, Dutch, German	
RBC-AMTU31-E	Wired Remote Controller	x	x	Main wired remote controller	
RBC-AMT32-E	Wired Remote Controller	x		Main wired remote controller	
RBC-AS41E	Simplified Wired Remote Controller	x		Dedicated for hotel and domestic applications	
RBC-AXU31C-E	Infra-red Remote Kit	x	x	Wireless remote controller	All ceiling units
RBC-AXU31U-E	Wireless remote unit kit	x	x	Wireless remote unit kit for 4-way cassette	4 way cassette series 1 & RBC-U32PGP-E
RBC-AXU33UP-E	Wireless remote unit kit	x	x	Wireless remote unit kit for 4-way cassette	4 way cassette series 1 & RBC-U33P-E
RBC-AX33UYP-E	Wireless remote kit	x	x	Wireless remote kit for YHP 1-way cassette	
RBC-AXU31-E	Infra-red Remote Kit	x	x	Wireless remote controller	All units
TCB-IFCB-4E2	Remote location On/Off Control Box	x		Enables remote location On/Off control	
TCB-IFCB5-PE	Window Switch & Remote on/off	x		Ensure the indoor unit not operate when outside window is open or for Door Entry systems	
TCB-IFCB640TLE	Analog interface	x		Control & monitoring up to 64 IU on TCC-link	Combination with TCB-IFCG1TLE
TCB-IFCG1TLE	General purpose interface	x		Enables control of A/C by the DI/DO and AI/AO	Combination with TCB-IFCB640TLE
TCB-IFLN642TLE	LN interface	x		Allows control of 64 indoor units from a Lonworks based BMS	
BMS-IFMB1280U-E	Modbus interface box	x	x	Connect the system to a Modbus Building Management System	
TCB-KBCN32VEE	Connectors	x		For CN32	
TCB-KBCN60OPE	Connectors	x		For CN60	
TCB-KBCN61HAE	Connectors	x		For CN61	
TCB-KBCN70OAE	Connectors	x		For CN70	
TCB-KBCN73DEE	Connectors	x		For CN73	
TCB-KBCN80EXE	Connectors	x		For CN80	
TCB-PCDM4E	Application Control PC Board	x		Power Peak Cut Control	
TCB-PCIN4E	Application Control PC Board	x		Error/Individual compressor Operation Output Control Board	
TCB-PCM04E	Application Control PC Board	x		External Master ON/OFF Control Board	
TCB-PCUC2E	Optionnal connection kit	x			
TCB-PSMT1E	Optionnal connection kit	x		Multi-Tenant Kit for VRF Systems	SMMS-u, SMMS∞, SMMS-e, SHRM-e and Mini-SMMS Indoor Units (refer to I/M for more details of connectable Indoor units)
TCB-PX100-PE	Enclosure for the Window Switch / Remote On/Off	x		For use when the Window Switch / Remote On/Off Accessory cannot fit within the AC unit, eg. High Walls	For use with TCB-IFCB5-PE
TCB-PX30MUE	E-Box Extension Enclosure	x		For 1:1 Model connection I/F and Window Switch / Remote On/Off PCB	4-Way Cassettes only & TCB-IFCB5-PE
TCB-PX40MUE	E-Box Extension Enclosure	x		For 1:1 Model connection I/F and Window Switch / Remote On/Off PCB	4-Way Compact Cassettes only & TCB-IFCB5-PE
TCB-SC640U-E	Centralized remote controller	x	x	Up to 64 indoor units	
TCB-TC41U-E	Remote temperature sensor	x	x	Remote temperature sensor for cassette & duct	
RBC-ASC11U-E	Wired Remote Controller	x	x	Main wired remote controller	
RBC-ASC11-E	Wired Remote Controller	x		Main wired remote controller	

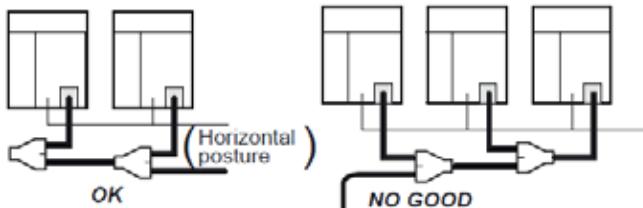

> SYSTEM RESTRICTION

	SMMS∞	SMMS-7
Outdoor unit combination	Up to 5 units	Up to 3 units
Total capacity of outdoor units	Up to 120HP	Up to 60HP
Indoor unit connection	Up to 128 units	Up to 64 units
Total capacity of indoor units	H2 ≤ 15m Max. 200% 15m > H2 105%	Max. 200% 105%

T-shape branching joint for liquid pipe

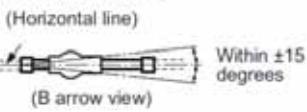

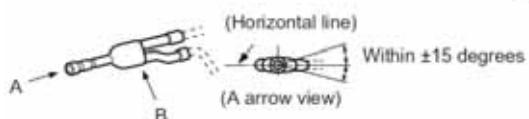

Y-shape branching joint for gas pipe

> CAUTION FOR INSTALLATION

Be careful of the connecting arrangement of the header unit and follower units. Set the outdoor units in order of capacity from the one with the largest capacity.

At a level position

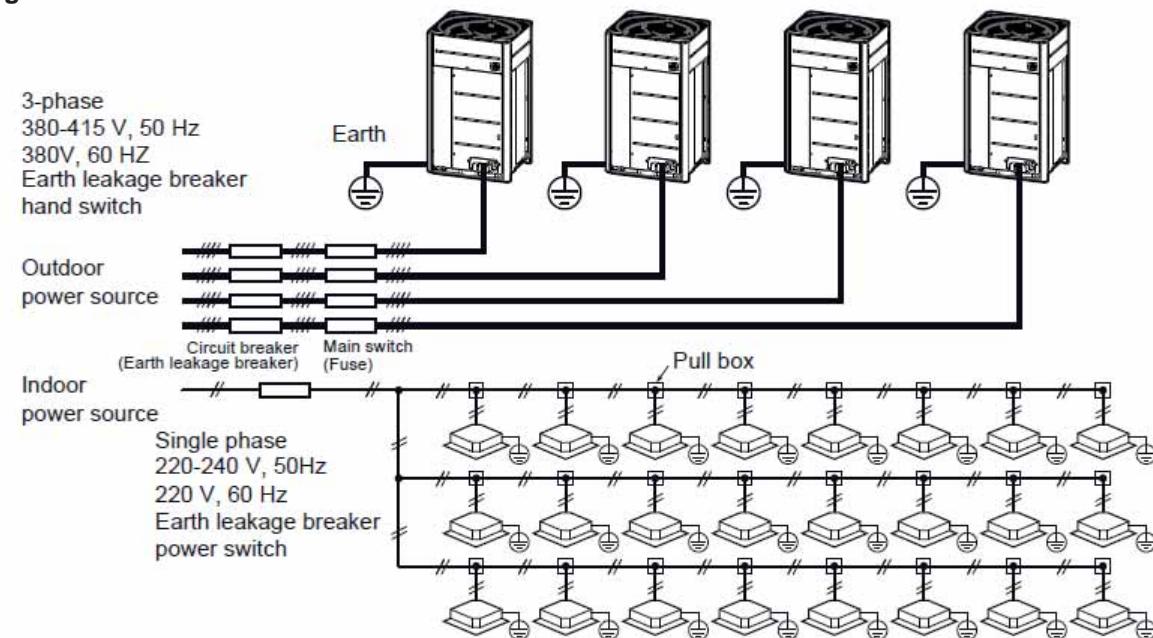

> FREE BRANCHING SYSTEM

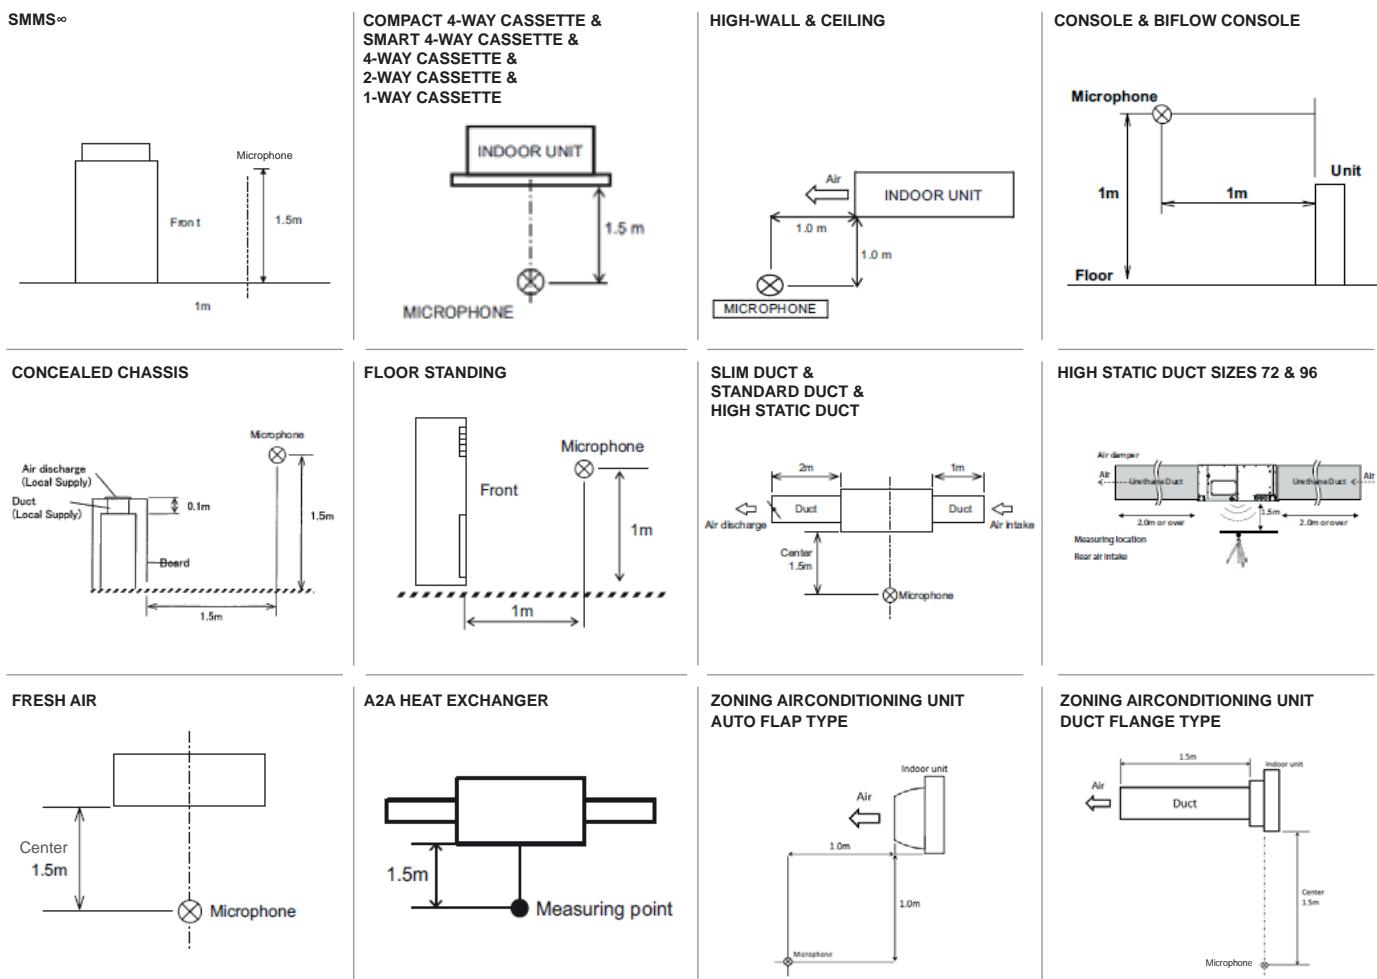

Line branching system	
Header branching system	
Header branching system after line branching	
Line branching system after header branching

SOFTWARE

> SELECTION TOOL

Software main screen

Toshiba Selection software has been fully designed, with a user-friendly interface allowing novice and expert users alike to create simple, yet detailed VRF system schematics. It is highly versatile, allowing the level of detail to be tailored to suit customer requirements. The software also allows the user to specify pricing strategy and create additional interim reports, including any diagrams and schematics required. Final detailed reports can then be produced and sent to customers in PDF format or in more complex files, such as AutoCAD DXF, allowing simple integration into their existing software packages.

Project fully customizable

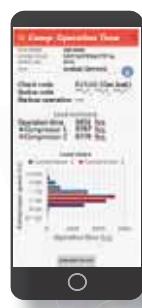

Complete report

> SERVICE TOOL

Save time during commissioning and maintenance. Choose between the "Wave Tool Advance" using Smartphone NFC connection or the link adaptor connected to the outdoor or indoor unit.

NEW Application Wave Tool Advance

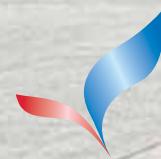

Wireless connection
using smartphone*
NFC technology
to collect system data

NOTE

TOSHIBA

Better Air Solutions

Through our commitment to world-class **efficiency**, versatile **scalability** and leading **quality**, Toshiba Air Conditioning advances leading-edge technologies to find the most forward-thinking solutions possible for your world.
